

# PROMINEO TECH

## Week 3: Coding Assignment

URL to GitHub Repository: <https://github.com/JessGerman/Week3-Assignment>

URL to Your Coding Assignment Video: <https://www.youtube.com/watch?v=thGpO8Yuaug>

After watching the video, *Source Control with git*, you should have already set up a GitHub account for this program.

If you have **not** setup your GitHub account, **review the above video in the Week 3: Weekly Videos and Curriculum** and set your account up before proceeding with this assignment.

### Instructions:

- Create a new repository on GitHub for this week's assignments and push this document, and any files that you have created to the repository.
- Include the URLs for this week's repository and video where instructed.
- Submit this document as a .PDF file in the LMS.

## Week 3: Coding Assignment

### Assignment Steps:

- The link below has a zipped file that contains an empty directory (folder) for your assignments.
- Download the file to your computer and unzip it.
- This directory (folder) should be used to organize each week's projects in the course.  
[https://drive.google.com/file/d/1WDc\\_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view](https://drive.google.com/file/d/1WDc_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view)

**Note:** In the following Git/GitHub Tutorial, a file is created in **Terminal** (on a Mac) using `touch filename`

To do the same thing in **Command Prompt** (on Windows), use the following command:

(Windows or Mac) `echo "text-to-put-into-file" > filename`

- Following the Git/GitHub tutorial in your week 0 video:
  - Create a directory (folder) inside **Week 03** directory
  - Create a repository on the GitHub website.
  - **Push** your directory of files to GitHub as instructed in the video.
  - After your first push, please ensure that you make some changes to your directory (folder), such as adding a new file or changing your code.
  - **Push** those changes to your repository a second time (as shown in the video).  
<https://www.youtube.com/watch?v=NGeksLUB1e8>
- When complete, paste a screenshot of your terminal or command prompt that shows the commands above completed.

### Video Steps:

- Create a video, up to five minutes max, showing and explaining exactly what you did for this assignment Git/GitHub.
- This video should be done using screen share and voice over.
- This can easily be done using Zoom, although you don't have to use Zoom, it's just what we recommend.

## Week 3: Coding Assignment

- You can create a new meeting, start screen sharing, and start recording.
- This will create a video recording on your computer.
- This should then be uploaded to a publicly accessible site, such as YouTube.
  - Ensure the link you share is **PUBLIC** or **UNLISTED**!
  - If it is not accessible by your grader, your project will be graded based on what they can access.

I'm showing my steps on the Terminal from the Desktop to create a new folder/ file and see it when I hit git init (where I can see the path name).

```
